

BRANDSTRO

YOUR ROLE: SKETCH ARTIST

Personal Operating Brief | Reports to: Creative Team Head | Version 1.0 | Full SOP: Section 6.6 / 13

*"You're the bridge between R&D's research and the Logo Team's digital production. Your sketches set the direction every final logo builds on — you don't need to make it pretty yet, you need to make it **right**."*

You are a capacity bottleneck by design, like R&D. One logo project can't move past you. Protect your time, work the queue in order, and flag overload early — don't just quietly fall behind.

WHAT YOU OWN

- Study the research brief and creative direction from R&D
- Produce 3–5 initial sketch concepts per logo project (standard)
- Explain concept rationale where required for handoff
- Submit sketches to the Logo Team with brief notes
- Refine on request if Logo Team or Creative Team Head asks for a direction adjustment

THE STANDARD

3–5

Distinct sketch directions per logo project — not 3–5 variations of the same idea. Each should reflect a genuinely different approach: for example, a wordmark vs. a symbol vs. a combination mark.

YOUR PART OF THE WORKFLOW

R&D Brief + Creative Direction → **YOU: Sketch 3–5 Concepts** → Submit to Logo Team → Refine if Requested → Handoff Complete — Logo Team Takes Over

YOUR WORKFLOW, STEP BY STEP

- 1 Receive the brief — usually from R&D, occasionally routed directly from the Logo Team
- 2 Sketch 3–5 concepts, noting the rationale for each in one line
- 3 Self-check against the quality checklist below
- 4 Submit to the Logo Team Leader with the research brief attached
- 5 Refine only if asked for a specific direction adjustment before digital development starts

QUALITY CHECKLIST — SELF-CHECK BEFORE YOU SUBMIT

- ☐ Concepts are visually distinct from each other — not near-duplicates
- ☐ Concepts are traceable to the research brief's positioning/visual direction
- ☐ Concepts are scalable to a clean digital logo (not overly intricate for the mark type)

You are **not** required to produce the final digital logo. Handoff to the Logo Team is the completion point of your part of the process — don't hold a sketch back trying to make it "finished."

YOUR RHYTHM

Daily	Work the sketch queue in priority order. Hand off completed concept sets the same day where possible.
Weekly	Report your queue length to Creative Team Head. Flag any project where R&D's direction was unclear — before you guess your way through it.

YOUR THROUGHPUT BENCHMARK

Function	Headcount	Approx. Daily Throughput
Sketch Artist (you)	1	≈ 1 concept set/day

WHAT YOU DECIDE VS. WHAT YOU ESCALATE

Decision	You
Which visual directions to explore within the brief	✓ Decide
Order of your own sketch queue among same-priority projects	✓ Decide
R&D's brief is unclear or contradictory	↑ Flag to R&D/Creative Team Head — don't assume
Your queue is consistently overloaded	↑ Flag to Creative Team Head early

HOW YOU'RE MEASURED

Metric	Measured Via	Reviewed
Concepts delivered on time	Project Tracker	Weekly
Concept sets requiring redirection	Project Tracker	Weekly

DAY 1 — WHAT YOU PERSONALLY DO

- ☐ Get access to the Project Tracker and Drive project folders
- ☐ Pull today's queue in priority order and confirm each brief is complete before starting
- ☐ Start applying the 3–5 distinct-directions standard from your very next project
- ☐ Flag your realistic daily capacity to Creative Team Head so the queue reflects reality
